SETUP INFORMATION

We will set your Organisation up based on the information that you provide overleaf - that way, initially you can focus on what goes into your Calendar/Event Diary, and what other Notices and Documents you would like to distribute.

Subsequently you can take over the management or we can provide this service for you.

The number of connections in your Setup does not need to be definitive. For your Residents, we have auto-populated 3 per Unit, and this can be amended as required later. One connection = the App enabled on one mobile phone or tablet device.

There are three tiers of Infrastructure available for your Setup.

Tier One Tier Two Tier Three

Whilst these are the terms used, they may not apply to your Organisation. You may have Streets, Villas & Connections, or if using the App to disseminate work information, you may use Sites, Teams & Connections. In due course we will provide more flexibility with terminology in this area - for now it's a case of adapting to this terminology.
